

ADDENDA #1

REQUEST FOR CLARIFICATION

October 16, 2020

Request for Proposals: Structural Engineering Services

Project: Sunshine Coast Community Services Society

Location: 5638 Inlet Avenue, Sechelt, B.C.

Question	Answer
1. In looking at the schematic drawings, we are assuming the lowermost 2 storeys will require concrete construction, with 4 storeys of LWF structure over. Is this the anticipated construction typology?	1. Combustible and/or mass timber construction for the upper floors. Light Wood Framing (LWF) will be one of the options considered.
